

Companion Planting Chart, Australian Gardens

What to plant next to what, for 65 vegetables, herbs and fruit.

Read it as one line per crop. Find the crop on the left, plant the things on the right near it. Nothing here has to go in the same hole, the same bed or the next row over is enough. Sowing months for every one of these are on its own guide page at gardenbuddy.au/veggie-guide/.

Amaranth	Onions, corn, peppers, egg plant, tomatoes
Angelica	Any herbs that like damp, shady areas - mint, lemon balm
Asparagus	Parsley, Basil, Nasturtiums, Lettuce
