

Vegetable Planting Calendar, Subtropical Zone

What to sow month by month in the subtropical zone of Australia.
This zone covers Brisbane, the Gold Coast, the Sunshine Coast, Toowoomba and Bundaberg.

 **Green means you can sow or plant that crop that month in this zone.** For seed tray, transplant and direct sow month by month, and for what to do when the window is nearly shut, see the crop's own guide at gardenbuddy.au/veggie-guide/subtropical/.

	J	F	M	A	M	J	J	A	S	O	N	D		J	F	M	A	M	J	J	A	S	O	N	D

Jerusalem Artichokes													Thyme												
Kale													Tomatillo												
Kohlrabi													Tomato												
Leeks													Turnip												
Lemon Balm													Watermelon												
Lettuce													Yacon												
Luffa													Yam/Oca												
Mint													Zucchini												

Perennials are not in the grid. Fruit trees, nut trees and the crops you plant once and keep have a planting window rather than a sowing month, which is a different thing and does not fit a twelve month row. In this zone that covers Apple, Avocado, Banana, Blueberry, Fig, Grapefruit, Jerusalem Artichoke, Leek, Lemon, Lemongrass, Lime, Macadamia, Mandarin, Mango, Mulberry, Orange, Papaya, Passionfruit, Peach, Peanut, Pear, Pecan, Persimmon, Pineapple, Plum, Pomegranate, Raspberry, Savory, Strawberry. Each one has its window on its guide page.
